*All vendors utilizing heating equipment, open flame devices, cooking, warming and serving food products are required to have a fire department inspection prior to opening. Any vendor operating without an inspection permit will be order to cease operation immediately.

All vendors are required to have a standard 2A10BC or larger fire extinguisher readily available and a K-class extinguisher if a wet chemical fire protection system is present. Extinguishers and/or ANSUL system must have current certification tag. All temporary membrane structures must have proof of fire retardant material or treatment.

Vendors need to contact Stillwater Fire Department 24 hours prior to opening to schedule an inspection.

* Vendor inspections are not exclusive to the above mentioned items. Please contact Stillwater Fire Department for inquiries.
